As of 31 July 2026. Benchmark: MSCI Emerging Markets (Net). The performance data quoted represents past performance. PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RESULTS. Performance of other share classes may vary and current performance of the portfolio may be lower or higher than the performance quoted. Performance data current to the most recent month-end may be obtained by e-mailing ucits@gqg.com or visiting gqg.com. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns greater than one year are annualized unless otherwise stated. Performance may reflect agreements to limit a fund's expenses, which would further reduce performance if not in effect. Returns are calculated net of taxes withheld on foreign dividends, interest and capital gains, and include the reinvestment of dividends and capital gains. Dividends are accrued as of ex-dividend date. There can be no assurance that the Fund will achieve its investment objective. Please see Appendix for additional important information.

REGION AND COUNTRY SPECIFIC NOTICES (cont.)

SOUTH AFRICA The Financial Sector Conduct Authority (FSCA) has approved and registered the GQG Partners Global Equity Fund and GQG Partners Emerging Markets Fund for marketing in South Africa under section 65 of the Collective Investment Schemes Control Act 45 of 2002. Before investing, review the Fund's full Prospectus and Supplement, together with the applicable "KID" or "KIID" and the most recent annual and semi-annual reports. You can get free copies from the Investment Manager (at gqg.com or ucits@gqg.com), the Administrator, or the local paying or representative agent or local distributor in jurisdictions in which the Fund is authorised for distribution. Investors should take cognisance of the fact that there are always risks involved when buying or selling any financial product. Past performance of a financial product is not necessarily indicative of future performance. The value of financial products can increase as well as decrease over time, depending on the value of the underlying securities and prevailing market conditions. The investment value of a financial product is not guaranteed, and any illustrations, forecasts or hypothetical data are provided for illustrative purposes only. This document does not constitute financial advice, a solicitation, invitation or investment recommendation. Prior to selecting a financial product or investment, it is recommended that South African based investors seek and obtain specialised financial, legal and tax advice.

GENERAL INFORMATION

This document may be distributed by GQG Partners LLC and its affiliates (collectively "GQG").

The information provided in this document does not constitute investment advice and no investment decision should be made based on it. Neither the information contained in this document or in any accompanying oral presentation is a recommendation to follow any strategy or allocation. In addition, neither is it a recommendation, offer or solicitation to (i) sell or buy any security, (ii) purchase shares in any investment fund that GQG may sponsor, offer or manage, (iii) establish any separately managed account, or (iv) implement any investment advice. It should not be assumed that any investments made or recommended by GQG in the future will be profitable or will equal the performance of any securities discussed herein. Before making any investment decision, you should seek expert, professional advice, including tax advice, and obtain information regarding the legal, fiscal, regulatory and foreign currency requirements for any investment according to the law of your home country, place of residence or current abode.

This document reflects the views of GQG as of a particular time. GQG's views may change without notice. Any forward-looking statements or forecasts are based on assumptions and actual results may vary.

GQG provides this information for informational purposes only. GQG has gathered the information in good faith from sources it believes to be reliable, including its own resources and third parties. However, GQG does not represent or warrant that any information, including, without limitation, any past performance results and any third-party information provided, is accurate, reliable or complete, and it should not be relied upon as such. GQG has not independently verified any information used or presented that is derived from third parties, which is subject to change. Information on holdings, allocations, and other characteristics is for illustrative purposes only and may not be representative of current or future investments or allocations.

The information contained in this document is unaudited. It is published for the assistance of recipients, but is not to be relied upon as authoritative and is not to be substituted for the exercise of one's own judgment. GQG is not required to update the information contained in these materials, unless otherwise required by applicable law.

The contents of this document are confidential and intended solely for the recipient. No portion of this document and/or its attachments may be reproduced, quoted or distributed without the prior written consent of GQG.

Any account or fund advised by GQG involves significant risks and is appropriate only for those persons who can bear the economic risk of the complete loss of their investment. There is no assurance that any account or fund will achieve its investment objectives. Accounts and funds are subject to price volatility and the value of a portfolio will change as the prices of investments go up or down. Before investing in a strategy, you should consider the risks of the strategy as well as whether the strategy is appropriate based upon your investment objectives and risk tolerance.

There may be additional risks associated with international and emerging markets investing involving foreign, economic, political, monetary, and/or legal factors. International investing is not for everyone. You can lose money by investing in securities.

Unless otherwise indicated, the performance information shown is unaudited, pre-tax, net of applicable management, performance and other fees and expenses, presumes reinvestment of earnings and excludes any investor-specific charges. All past performance results must be considered with their accompanying footnotes and other disclosures.

Past performance may not be indicative of future results. Performance may vary substantially from year to year or even from month to month. The value of investments can go down as well as up. Future performance may be lower or higher than the performance presented, and may include the possibility of loss of principal. It should not be assumed that investments made in the future will be profitable or will equal the performance of securities listed herein.

INFORMATION ABOUT BENCHMARKS

MSCI Emerging Markets (Net) Index

MSCI benchmark returns have been obtained from MSCI, a non-affiliated third-party source. Neither MSCI nor any other party involved in or related to compiling, computing or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in or related to compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility. The MSCI Emerging Markets (Net) Index is a float-adjusted market cap weighted equity index, which tracks stocks from emerging market countries. The index reflects reinvested dividends that are net of foreign withholding taxes, is unmanaged, and does not include the effect of fees. It's not possible to invest directly in an index.

Information about benchmark indices is provided to allow you to compare it to the performance of GQG strategies. Investors often use these well-known and widely recognized indices as one way to gauge the investment performance of an investment manager's strategy compared to investment sectors that correspond to the strategy. However, GQG's investment strategies are actively managed and not intended to replicate the performance of the indices: the performance and volatility of GQG's investment strategies may differ materially from the performance and volatility of their benchmark indices, and their holdings will differ significantly from the securities that comprise the indices. You cannot invest directly in indices, which do not take into account trading commissions and costs. Net total return indices reinvest dividends after the deduction of withholding taxes, using (for international indices) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

INFORMATION ON RISK STATISTICS AND FUNDAMENTALS

Risk statistics utilize monthly returns. Standard Deviation: Absolute volatility measured as the dispersion of monthly returns around an average. Sharpe Ratio: Return per unit of risk measured as the excess return (over a risk-free rate) divided by standard deviation. Alpha: Risk-adjusted excess return versus the benchmark. Beta: Relative volatility measured as systematic risk relative to a benchmark. Upside Capture Ratio: Performance in periods where the benchmark was up. Downside Capture Ratio: Performance in periods where the benchmark was down. R-Squared (R2): Benchmark fit measured as the percentage of return movements explained by the index.

Active Share: Proportion of portfolio holdings that differ from the benchmark. Dividend Yield: Annualized percentage of stock price paid out as dividends. Dividend yield is calculated as a weighted average of the dividend yields of the securities held in a portfolio. The reported dividend yield is gross of fund expenses and fees and does not represent the actual income distributed to shareholders. This data point is not guaranteed, may fluctuate with market conditions and interest rate changes. It should be considered alongside potential capital volatility and longer-term risk factors. Earnings Growth: Annualized growth rate of companies' earnings per share. Return on Equity: Percentage of earnings relative to company equity. Free Cash Flow Yield: Percentage of free cash flow relative to company equity. Price/Earnings: Price to earnings per share ex negative earners. Price/FCF: Price to free cash flow per share. Price/Book: Market price of a stock divided by the company's per-share book value. Market Capitalization: Company number of shares outstanding multiplied by the current price per share. Weighted Average Market Cap: Average market cap of portfolio companies weighted by portfolio weighting of the company. Median Market Cap: Midpoint market cap of companies in a portfolio.

Allocation Effect: Outperformance of the Fund that is attributable to sector over/under weights in relation to the Benchmark. Selection Effect: Outperformance of the Fund that is attributable to the selection of stocks in relation to the Benchmark. Active Return: Total outperformance of the Fund, which is the combination of the allocation and selection effects.
